

All benefits at a glance

The FleetBoard DispoPilot.mobile fits in every vehicle

- **All-in-one device for fleet-encompassing logistics management:**
Provides all FleetBoard Logistic Management Services and contributes to more secure processes, a more efficient fleet usage and less detours.
- **Light-weight with an industrial design:**
DispoPilot.mobile is portable and suitable for use in trucks
- **Easy to Commission:**
The device is ready for operation; the dispatch agent or FleetBoard support can activate it quickly
- **Plug and play ensures fast installation:**
The driver can easily set up the DispoPilot.mobile, suction cup mounting and the charging cable

- **Flexibility without a mass of cables:**
Can be easily moved to other vehicles; No antenna cables are required
- **Professional support for all drivers:**
Direct transmission of all tour and order details to the DispoPilot.mobile prevent detours and misunderstandings

DispoPilot.mobile Plug and Go

The flexible Logistics Management Solutions

■ For flexible use in any vehicle

The high-performance and user-friendly DispoPilot.mobile provides FleetBoard Logistics Management services in any vehicle.

The driver can mount the robust plug-and-play handheld device (integrated GPS/GPRS function) to the windscreen in seconds and the dispatch agent can quickly integrate it into the logistics chain

This ensures the smooth integration of external trucks in your fleet.

The service is of particular interest to rental companies who wish to offer their customers an optimal logistics system in rental vehicles.

■ Strong, compact and multi-functional

- GSM/GPRS modem for data transmission with a European flat-rate including
- GPS receiver for position location
- Barcode scanner
- Colour display with touch screen user interface
- Protected against dust, moisture and drops
- Remote Updates, new software features can be uploaded as needed

■ More than just navigation

In dispatching:

- Order management and communication between driver and dispatcher
- Connection to dispatching software systems
- Positioning and mapping
- Monitoring areas and arrival times
- Order tracking

In the vehicle:

- European-wide truck navigation
- Individual status messages in the vehicle, tour and order levels with workflow
- Barcode scanning and load list comparison
- Recording and transmission of the electronic signature

■ It's only a few steps from an order to use in day-to-day business

■ Order & Shipment:

The company orders the desired number of DispoPilot.mobiles from FleetBoard; Daimler FleetBoard processes the order and ships the installation package

■ The DispoPilot.mobile installation package comprises:

- DispoPilot.mobile including Navigation of Europe with vehicle attributes and FleetBoard SIM card
- Vehicle mount and suction cup
- Cigarette lighter cable for the power supply

■ Use:

The dispatch agent either activates the DispoPilot.mobile directly in the desired fleet or uses FleetBoard Support
